PERSONAL PROJECTS

Swiggy Clone Food Website (12/2023 - 12/2023)

- FeastlyFare is a streamlined food delivery web app inspired by Swiggy, designed using ReactJS for dynamic user interfaces, React Router for seamless navigation, and Redux for global state management. This project emphasizes modern web development techniques including lifecycle methods for optimal loading and performance, alongside features like product sorting, filtering, and a user rating system.

Real time weather application (06/2022 - 06/2022)

- Build a React JS weather app using the OpenWeatherMap API. I had used axios to connect with our API.
- <https://github.com/iamvinay79/flowerwebsite.github.io>

Cloud based ERP system (01/2021 - 03/2021)

- A college management system built using Django framework. It is designed for interactions between students and teachers. Features include attendance, marks and time table.
